

DATE: July 2, 2024
TO: PAU Faculty, Staff, and Students
FROM: People Operations Department
SUBJECT: COVID-19 Protocols Update for Summer Term

Dear Faculty, Staff, and Students,

As we have regathered for the summer term, we would like to remind our employees and students that PAU continues to follow the protocols established by the Santa Clara County Public Health Department and the California Department of Industrial Relations. Please visit the [Health & Safety page](#) on our website for full details.

Although masks are not currently required, PAU relies on employees and students to help keep our campuses healthy and safe. Please be mindful that COVID-19 may be infectious for around 10 days after becoming sick or testing positive, and that people who have [certain medical conditions](#) are at risk of becoming very sick with COVID-19. Please follow the Santa Clara County Public Health Department's [isolation and masking requirements](#). Test kits are available for students at the Gronowski Center, Mountain View and Allen Calvin campuses.

Both students and employees continue to be required to report either a positive COVID-19 test and/or an exposure to a confirmed case of COVID-19. Please report your exposure or positive test to peopleoperations@paloaltou.edu.

With Gratitude,

People Operations Department
